[redacted]

I am writing to say that the Location of this property to be turned into a childrens home is on one of the most busy sections on the main carriageway. there is a sharp blind turn into the drive & if driveway gates are closed as they probably would be for childrens safety it would be very dangerous for a car to pull up to gates as it would be parked across footpath and very close to road and with no right turn coming out only a left turn into busy traffic,with children multiple journeys will be needed,this is not a location where you would choose to have endless people coming and going..and a children's home would create this,teachers,social services,staff,visiting families,cleaner's,emergency services, food deliveries,etc.
These children at some time will want to walk along to manor park,their school into lancing or even into Worthing or Brighton. There is only a grass verges alongside this busy road with cars travelling at fast speed and not at the 40mph speed limit.
As a resident who lives in one of the detached properties I know first hand of the dangers of this road and take precautions to slow down well in advanced to turn in and have had some very close accidents of being hit from behind due to the speed cars are travelling.
So I would suggest the planning application be turned down, as children need a safe place and this is not the right place for a childrens home
