The drawing of the house is incorrect as it is a cornish unit type 1 the drawing does not support this
The outside render is only fibre board which was rendered and pebble dashed for cosmetic effect
I feel that the side extension should not be used as a boundary wall
I see that it is stated trees and hedges would not need to be pruned or removed if this work was done from my side of the fence this would not be true plus a lot more disruption which i do not need
yours sincerely
