Dear Sirs,

With reference to your recent letter AMDM/0026/12 concerning the land in Ship Street, a much needed previous car park.

Our cottage is situated at the rear of this site, (it is Grade 2 listed 1612!) & is sited below Street level, which means we will be dominated by the proposed houses to the rear of the cottage! They seem much to high! We note from the plans there will be dormer windows at the back of the houses, which will overlook our back garden. Would suggest that VELUX windows would be more acceptable?

Four houses will mean even more cars in those narrow streets - where do people park? Surely a car park is vital in this area?
