Tree Survey and Inspection

Tree (*Species*)	T1 = Eucalyptus T2 = Leylandii T3 = Laburnum T4 = Birch T5 = Walnut T6 = Holly T7 = Yew	Age (*est*):	T1 = 20yrs T2 = 15 T3 = 15 T4 = 15 T5 = 30 T6 = 20-30 T7 = 15-20	Height:	T1 = 14m T2 = 7-8 T3 = 7-8 T4 = 7-8 T5 = 8-9 T6 = 6-7 T7 = 4-5

LOCATION (Site Address) 32 Southdown Road Shoreham

Importance of tree to locality Conservation area Trees

REMARKS / CONDITION:

T1 = Good condition with no obvious signs of damage or decay.
T2 = Row of Leylandii presumable planted to create a hedge between properties. The trees have out grown their use as a low level screen.
T3 = Small slightly stunted tree at the end of the row of Leylandii.
T4 = small thin tree in amongst the row of leylandii – not in a suitable place to plant a tree.
T5 = Medium sized tree in lawn of rear garden
T6 = Dense crowned tree on East boundary.
T7 = Small tree on boundary line between 32 and 34.

WORK / REQUIREMENTS;

T1 = Re-pollard to original points, approximately a 40% crown reduction.
T2 T3 T4= These trees are not planted in a suitable location for them to develop or be retained. The Leylandii crowns are to tall to create a hedge, and the Laburnum and Birch could not be allowed to develop in their current location.
T5 = Crown lift up to 2 -2.5 meters to clear shed.
T6 = Crown lift up to 2-3 meters to clear wall and reduce overall weight of the crown.
T7 = Remove 2 lower branches on the East side of the tree, to reduce crown spread.

Recommend above works be permitted.

TREE VALUE

A	Important tree worth saving	
B	Less important than above	✓= T1 T5 T6 & T7
C	Suspect tree requires monitoring	
D	Dead or of no consequence	✓= T2 T3 & T4
