The Optimum Look

The KS1000 Optimo represents a dramatic breakthrough; pre-engineered cladding systems, delivering a flat, clean, smooth, aesthetically appealing, and modern result.

So whether considering a new build or refurbishment project, with Kingspan Optimo Wall and Facade Systems specifiers can now be confident that there is a practical solution to optimise the visual impact of any design.

The systems, with their slim sight lines, create a visually striking appearance for the building's all-important wall envelope. Available in cover widths of 600, 900 or 1000mm, the systems have hidden joints that conceal fasteners from view. The advanced Optimo Systems also come with a broad range of accessories which provide design flexibility with enhanced visual impact to ensure an integrated solution is achieved. Kingspan Optimo can be used in conjunction with the full range of architectural wall systems. This allows a variation in colours, textures and profiles of the panels, which creates an interesting blend on the building.

The Optimo Systems are available with Kingspan's FIREsafe Loss Prevention Certification Board (LPCB) and Factory Mutual (FM) insurer approved specifications.

The Optimo Systems are backed by Kingspan's comprehensive product guarantee and technical support.

Approved to LPS 1181
Certificate No's 2608 & 1869
