7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).
Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

Rear Garden - Left Hand Side
T1 - Walnut
Reduce height and spread by 4-5 metres, shaping and balancing the remaining crown accordingly.

Rear Garden - Bottom Boundary
T3 - Walnut
Reduce height and spread by 2-3 metres, shaping and balancing the remaining crown accordingly.

REASONS:
T1 & T3 - Located in a domestic rear garden the subject trees have mature crowns that are casting excessive shade and affecting the reasonable enjoyment of the garden area. Being on the edge of a wooded area they have a natural bias growth habit towards the garden. The suggested works are also part of an ongoing maintenance programme to retain the trees at a more suitable size for there location.

7. Identification Of Tree(s) And Description Of Works

Rear Garden - Centre
T4 - Indian Bean
Reduce the bias side of the crown by approximately 4 metres to reduce weight and sail, shape round accordingly.

REASONS:
T4 - The subject tree has a large spreading crown and has some large load bearing limbs. The tree has had limb failures in the past and there are stress cracks on the main stem. The tree also has an excessive lean and apart from removing the tree entirely, reduction works are the only other solution that will reduce the risk of further failures.

8. Trees - Additional Information

For all trees
A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

For works to trees covered by a TPO
Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

1. **Condition of the tree(s)** - e.g. it is diseased or you have fears that it might break or fall:
   If YES, you are required to provide written arboricultural advice or other diagnostic information from an appropriate expert. ○ Yes ◉ No
