Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I would like to object to this application as the parking here is horrendous. This will only increase the volume of cars around the area which is already over the capacity in which the streets can cope with. It doesn't help with the zone permit ending at the end of my street. With having 2 large schools in very close proximity this makes it even busier and harder to park in my designated zone which I pay yearly for. Even during the day now I have found myself on numerous occasions having to park further and further away from my property. With the mosque requesting an extension and no application for them to have additional/adequate parking included into this it will restrict our (the residents) already over stretched parking availability in the surrounding streets that we pay for. There needs to be adequate parking provided for the mosque, by the mosque to allow the residents to be able to try and park near their homes which is already severely over stretched.
