Dear Sir,
Having examined the amended plans for 72 Connaught Avenue we cannot see much change, therefore our original objection still stands which mainly is:-
We object to the size, design and appearance of the rear Dormer on such a small bungalow. It will be overpowering for us and affect our light. We are also worried that the weight of it on an unsupported wall will put a strain on the shallow foundations of his property and our shallow foundations too.

We also would request that the space between the Dormer to our boundary is say 4 feet to allow maintenance on his Dormer without workmen encroaching on our tiles at all.

We also note that the top roof end does not slope as ours does. This was a requirement by the Council when ours was built.

The front Dormer is of a much different design to ours which will look odd and unbalanced. The rear Dormer issues for us, however, are the most serious
and we would like you to consider an improvement for us on this.

Yours faithfully,
Mr. & Mrs. D.Young.
