This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals.

I refer to your consultation in respect of the above planning application and would provide the following comments.

This proposal is for single storey side and rear extensions. The site is located and accessed via private access lane which leads to the publicly maintained Mill Lane which is an unclassified road subject to 30mph speed limit.

There are no proposed alterations to the existing vehicular access An inspection of data supplied to WSCC by Sussex Police over a period of the past five years reveals that there have been no recorded injury accidents within the vicinity of the site. Therefore, there is no evidence to suggest that the existing access is operating unsafely or that the proposal would exacerbate an existing safety concern.

The proposed extension would not result in greater demand for car parking.

Conclusion
The LHA does not consider that this proposal would have an unacceptable impact on highway safety or result in 'severe' cumulative impacts on the operation of the highway network, therefore is not contrary to the National Planning Policy Framework (paragraph 111), and that there are no transport grounds to resist the proposal.
