Dear Ken,

I have finally received a response from the EA on this one unfortunately their response was not of any use….

"Thank you for consulting the Environment Agency. However in line with the External Consultation Checklist we will not provide any response to applications that fall outside of the checklist and this applications falls outside of it. Therefore we have no comments to make."

The applicants are not pleased with the amount of time they have had to wait for this application to be processed.

Is it your view that this can now be approved with the amendments as submitted and discussed with you directly.

Please let me know, thanks
Hannah

Thank you for letting me know.

I will consult the EA.

Thanks
Hannah

Good Morning Ken,

I have received the below email from Hannah in the planning department. I have considered these and updated the plans to show the annex raised by 300mm to incorporate a suspended timber floor. Please see attached plans and updated flood risk assessment.

Kind regards,

Emily Lanham

Thank you for your email. If it is limited to this minor increase and this is necessary I would seek to support this however we would need to readvertise to neighbours for 14 days as this is an increase.

Once amended plans are received then I can readvertise, however if you could make sure Ken Argent and The Environment Agency are happy with the changes prior to formal resubmission this will save time.

Thanks

Hannah

Dear Emily,

Sorry for the delay here - prior to putting my report through last week I received comments from our drainage engineers the following comments have been made....

"The proposal is to effectively change the garage into a habitable annex.

The EA should be consulted as this is within Flood Zone 3, and they are likely to initially object as there is a proposal for a bedroom, at ground level.

The FRA does not tell me about ground levels or how the roof drainage will be disposed of - should go directly to the ditch.

I personally have few concerns except to say that this property's garden has been flooded in the past so there is distinct possibility that the extension might get wet in the future.

The ground levels around No 40 are higher so this is less likely to flood but there is an issue with the Doctors surgery at No 38.

The flood risk is from surface water / ground water not tidal flooding despite the site being in Flood Zone 3.

There is therefore still a significant risk, and the FRA should acknowledge this and give more details of flood protection measures."

Please could you therefore submit a new FRA which addresses that set out above we can then consult with the Environment Agency for their approval. Did you discuss the proposal with The Environment Agency at Pre application stage as suggested? what were their views - If not it would be worth discussing with them prior to submission of the FRA to make sure that what you are submitting satisfies their requirements.

Please could you confirm receipt of this email. I look forward to receipt of further information for consultation.

If you wish to discuss these comments please contact Ken Argent, Engineer 01903 221374 or Ken.argent@adur-worthing.gov.uk

Yours sincerely,

Hannah Barker

Hi Hannah,

We are looking to build the annex for my 70 year old infirm mother who currently resides on her own and ultimately ends up staying with us most of the year.

She will need to be comfortable in her own space and would prefer to be as separate from the main house as possible avoiding use of stairs where possible.

Kind regards

Mr and Mrs S Tandy

Dear Emily,

I am writing up the application for 48 Old Shoreham Road. There is no statement within the application documents referring to the need for the annex - for a dependent relative etc. Please could you submit a written statement to be considered with the application.

Thanks

Hannah
