To Mr Gary Peck

I am writing again in response to the new amended plans for 60 holmbush way, southwick, Bn424yd.
Looking at the amended plans it seems like it is starting to be more of an extension rather than a conservatory now. I can also see the measurements have changed for the projection by only a minimal amount and even less for the height. This will still be a huge impact on my natural light in my garden and also my living area of my home. The build is so close to my home and garden starting literally at my border on the other side of my fence. It is an encroachment on my personal space too as well a loosing all the lovely natural light I currently receive. We are now in September and already the sun is so much lower in the sky and I am already noticing a drop in light. With this build it will be made so much worse and I will receive even less.
I still stick with everything I have already explained in my previous appeal and would also like to add the huge change in appearance of the houses. As you can see both our houses are symmetrical and I feel by having this extension it will not be in keeping with the look of the houses.
Another concern I have, which I thought about after my last appeal, is the level of noise that will be created as the build will be extended beyond my house so instead of hearing noises on the other side of my living area, I will now be hearing noises out to the back of my house and especially more when I am in the garden as the extension will be right next to my sitting area on my decking. The build will feel like it's on top of me and as I said earlier, an encroachment on my privacy and space in my own home.
I feel very strongly that this build will cause so many upsetting and unnecessary impacts on myself, my family, future families if and when I decide to move and also to all the neighbours next to and at the bottom of the property.
Again I enclose a couple of photos for you to see how on top of my property and personal space the build will affect me. The build is as high as the existing roof that you can see in the picture and the projection comes out to between the edge of the outdoor sofa and the edge of my decking.
Thank you again for taking the time to read my appeal and I would be very grateful for you to look at my concerns carefully and take them into consideration.

Yours Sincerely
Kristina Burcham
