Dear Sir

Re Planning Application for Blandford Cottage BN43 5FE
Plans submitted by DMB Solutions.

Occasioned by my ongoing health problems I was mortified to be told by DMB Solutions that your Council has expressed the view that the size of the proposed extension might be reduced.

I suffer from Trochanteric Pain Syndrome in my left hip after numerous injections and treatments this condition still remains and will do so. Further I have femoral nerve dysfuntion in my right hip caused during a hip replacement procedure this condition is irreparable.

The foregoing coupled with my arthritic knees confines me to live at ground floor level climbing stairs causes pain which means that all movements are restricted even to the extent that I do not drive a car and the one as a passenger is a Renault Espace (an estate) which I can climb into. I cannot without great discomfort get in or out of an ordinary size car. I am the holder of a blue badge.

The cottage is situate away from a shopping centre hence I must in the short term rely on others to drive me. The time is now approaching when I will have to buy and use an electric conveyance for all outside use and a wheelchair for inside my home. Both will have to stored and I am told that an electric unit requires more than a limited amount of space to turn.

Let me ask you to kindly review your tentative decision and allow the application to be approved

Kind regards

Margaret Cowell (Mrs).
