HOUSE WALLS :

Knapped flint pointed with grey mortar.

The most local building material. Flint has been used for building in Worthing and the South Downs for hundreds of years.

TIMBER CLADDING TO PORCH:

Lunawood Thermowood Luna Triple

https://lunawood.com/product/luna-triple-shadow-32x140/

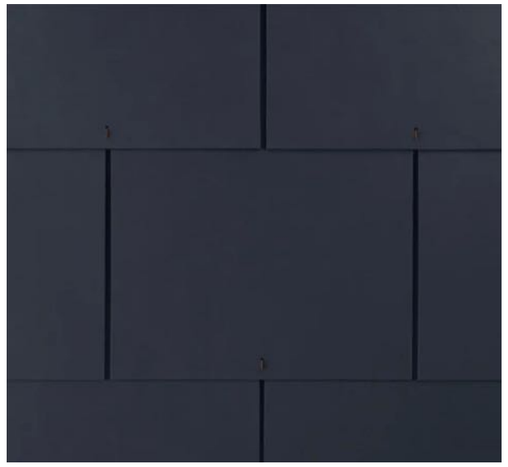
Grown in renewable forests, lunawood products are thermally modified using only heat and steam. They do not require surface treatment making thermowood an ecological choice.

HOUSE AND GARAGE ROOF:

Cedral Thrutone Smooth fibre cement slate in blue-black:

https://www.cedral.world/en-gb/roofing/fibre-cement-slates/thrutone-smooth/

These fibre cement slates give the appearance of a natural slate roof and are A+ rated in the BRE green guide. They are suited to low-pitch roofs



GARAGE AND BOUNDARY WALLS:

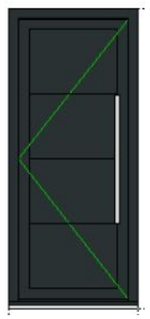
Marshalls Greylake facing bricks.

https://www.marshalls.co.uk/commercial/product/greylake-facing-brick

These bricks are manufactured in the UK using materials sourced within 50 miles of the manufacturing works. They are manufactured with a low cement content and no additional heat. The embodied CO2 of these bricks less than half that of a clay brick.

FRONT DOOR:

Powder-caoted aluminium in RAL 7016, Anthracite



GARAGE DOOR:

Powder-coated sectional steel door in RAL 7016, Anthracite

GATES TO VEHICLE AND PEDESTRIAN ENTANCE:

Galvanised steel with 40mm box section frame and 16mm infill bars
