Hello

I live in Carlyle House opposite the site of the proposed planning application.

I realise I have passed the date required for objections. However I did register shortly after I received the notification about the proposed planning.

I am not computer savvy, but was expecting some sort of e-mail or documentation, mentioning how to go forward.

Today I walked to the council building & was shown to a computer, which made me realise I was past the date required.

I had phoned previously to speak to Louise Prew but was constantly cut off.

I would like to point out Carlyle House would be very close to the proposed building, blocking light & overlooking our very much smaller building.

The council building opposite the listed building mentioned blocks the sun from 14.00pm now making it very dark on a dull day.

I believe there are light restrictions on new buildings, this very tall building would certainly affect the light into Carlyle House.

Although I am late submitting this letter, i would hope someone will take notice.

Regards

Anne Leckey
