Planning Application AWDM 1154/16

I am writing in response to the amended plans for the above planning application. We welcome the changes that will retain more of the grass verge and give an improved line of sight to traffic, to allow easier egress from our driveway.

However, we feel, that the other points raised in my letter dated 29th August are still Valid. Having lived in our house for 32 years, having a wall built along our front garden boundary feels like an intrusion. Although the wall will now only be 4 metres in length, its height will still, in part, be above the top of our living room window, still affecting light levels.
