Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Overdevelopment - Trees and Landscaping
Comments:	Dear Planning Team, I am writing to strongly object to the proposed 5G mast.

I am concerned about how ugly those towers look. How they spoil the local views causing extra upset to local residents as well as potentially causing distraction to motorists on this busy road.

This local area is extremely beautiful.
There is much local wildlife of which some are quite rare.

There is data available showing that wild life is negatively affected by 5G and this is most certainly a grave shame in an area of wetlands natural beauty.

It should be noted that the playing fields just behind the proposed site will no longer be as beautiful to relax in.
Any photos taken within/near to the cricket pitch or the bowls green will no longer look beautiful. Any potential visitors/tourists will be put off by the unsightly tall tower.

There is already a similar tower placed in a parellel road closer to the sea by the Shell Garage in Shoreham. This has already shown to be an eyesore.

With possibly two towers soon affecting our beautiful local views, I must object very strongly.

In addition;
There is research showing that people experience headaches when passing 5G towers.
Headaches can cause 'distraction' for some drivers. This is a concern, as this proposed 5G tower is placed just on the edge of one of the busiest roads along this south coast.

Will there potentially be more accidents on this roundabout once the 5G is turned on?

Do we wish to 'test and try out' and risk lives being lost? No, of course not....that would be wrong, immoral even.

As an ex-nurse and a researcher, I am significantly concerned about the health impact of 5G.
Anyone who approves such a thing has surely not researched/understood the damage that EMF from an active 5G mast can cause.
I mentioned earlier the damage to wildlife such as distraction/death of insects, bees and birds (detrimental to the survival of fruits .... and humans).

The park just behind the proposed site, the leisure centre, the local school, the local residents and any passing traffic could be negatively impacted by the EMF from 5G towers.

The wildlife, locally to this proposed tower, has already been significantly affected by a newly constructed housing estate.

It is really important to note that the 'carbon footprint' of an active 5G mast goes against the current political aims. We are supposed to be doing all to reduce the carbot footprint, not increase it.

This is equally very concerning.

Please reassure me;
As many of you are voted into your positions because of our trust in your integrity, I am hopeful that any decisions which could potentially affect our health are made based on genuine & honest research.

A 5G mast could affect you&me, your&my children and your&my children's children.
Therefore I request that you do not agree to the activation of this mast or any erection/extension of a 5G mast in the future.

Thank you for helping us keep our community safe and attractive as well as assisting our local nature/wildlife survive.

Yours sincerely
Nina Vinther
