To whom it may concern,

I am applying for permission to construct a side extension to my property in order to provide suitable accommodation for a dependent relative for whom I have ongoing caring responsibilities. The existing layout of the house does not offer the space or facilities required to meet their daily needs safely and comfortably.

The proposed extension is essential to create an appropriate living environment that supports both their wellbeing and my ability to provide continuous care. It will allow for improved accessibility, adequate personal space, and a more functional arrangement that meets the practical requirements of long term care within the home.

This development is therefore necessary to ensure that my dependent relative can remain in a safe, supportive, and stable setting, while also enabling me to fulfil my responsibilities as their primary carer.

Yours faithfully,

Tiffany Hilton
