EE and 3 currently have a temporary radio base station located on land on the western side of Romany Road (opposite its junction with Poplar Road) which provides network coverage to the surrounding area. This site is being lost from the network for reasons beyond the operators' control. The loss of an established site from the network can result in a loss of communications and data services locally and wider disruption to the network if a replacement site capable of adequately replicating coverage within that specific area is not identified and integrated into the network at the earliest opportunity.

Additional information

Are you submitting a declaration confirming that the apparatus is in full compliance with the requirements of the radio frequency (RF) public exposure guidelines of the International Commission on Non-Ionizing Radiation Protection (ICNIRP)? The emissions from all mobile phone network operators' equipment on the site must be taken into account when determining compliance.
