Re: Planning permission reference AWDM/0795/11
14, Eastern Sands caravan park, 100 Brighton Road, Lancing, West Sussex

Dear Keith Morgan

I am writing regarding the above planning notice for installation signs and flagpoles next to where I live.
I object on the following grounds:

1. The junction of the slip road entrance/exit to the caravan site and the A259 is currently only barely safe for traffic both entering/exiting and driving along the road. Erection of flags and signs will further disrupt the traffic by distracting the drivers travelling along the A259.

2. Flag poles are known to be noisy and annoying with the constant tapping or ringing as the ropes hit the poles. This particular area is prone to be windy and I anticipate that even in light winds the noise will be annoyingly unbearable day and night, and may adversely affect the health and wellbeing of my family and surrounding residents.

3. The owners of the site cut down all the trees affecting the appearance of the area, the installation of these poles will even further change the character of this piece of land which has sustained its status quo since at least 1928.

The existing trees on the site were removed a few months ago and we were not notified of any planning consent being given for this 'effect on trees'. This has had a detrimental effect on the wildlife on this site. It would be beneficial to reinstate the trees on this site to replace the 'character' of the area. Failing this, then appropriate landscaping would be acceptable without large signs affecting the appearance of the site. We hope that replanting of trees will encourage wildlife to once again inhabit this area.

I hope you will take my concerns into consideration in this matter as my wife has lived in this house since 1945 and as you can imagine we care deeply for the habitat where my family lives.

Yours sincerely

Mr and Mrs DJ.Garrard.
