Kind attention Jackie Fox

Dear Jackie Fox

I have just had phone call from my Landlord informing me he has just had sight of the plans for variation of original proposal for new building at 29 Richmond Road.

He tells me a proposal has been made to remove the side window from my lounge (flat above shop)

and install a roof light.

He is not in agreement with this proposal.

I told him that owner of 29 Richmond Road only discussed with me last week the idea of window removal and roof light. I told her I did not agree and anyway roof light would not work as above lounge and below roof is large attic space.

I have made following comment of planning application

Quote

Understand owner of 29 Richmond Road has applied for blocking side window in 27 and fixing roof light.

Please be advised this was only discussed with me last week and I informed applicant the I do not agree to proposal and want to keep side window. Further informed between ceiling of lounge and roof is attic space so roof light woud not create light in lounge.

Owner/My Landord informed me today 9th October 2026 that he has only just heard about proposal and was also not in agreement.

Unable understand how application can be made to radically alter another owners property without that owners agreement.

Please confirm the application to take away side window and instal roof light will be refused.

Thank you

Malcolm Watson

Tenant of shop and flat at 27 Richmond Road

Unquote

Grateful for your confirmation that owner of 29 Richmond Road will not be allowed to block out the side window of my lounge.

Thanks and regards

Malcolm Watson
