Comments Details

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Reasons for comment:
- Privacy Light and Noise
- Trees and Landscaping

Comments: Having seen the how close the groundwork has come in almost undercutting the ground under the boundary fence between our properties I am concerned about how close the actual building will be to the bottom of our garden. It will feel somewhat oppressive to have the 2 storey extension right up to the boundary. Especially as we sit in the lower part of the garden in the evening to catch the evening sunshine in the summer
I am concerned that the construction work will impinge further on our garden and do not want any scaffolding overhanging, building materials, dust or debris dropped into our garden during construction. Having had the "pleasure" of listening to the music being played by the ground workers whilst they cleared the trees and hedge from between our properties prior to the submission of the application, I am also concerned about disturbance during the construction work. Particularly in light of an identical project that was undertaken at number 9. There was a lot of drifting dust coming across when they were using grinding and cutting equipment during the construction.
