The proposed new extension to provide a new departmental entrance and clinical space has been considered by WSCC as the Local Highway Authority. WSCC raise no objection in principle however it is not clear from the application if there will be an increase in visitors as a result of the increase in clinical space.

How will this impact the current parking provided and will this create an increased demand form spaces? How will this be managed?

Does the hospital have a travel plan and a car parking management strategy? As the hospital are increasing clinical space we would expect to see what trip impact, if any this will have and how it can be accommodated.
