To planning services

Dear sir or madam

I am writing to you because of the proposed development onto the adjoining property 13 Griffiths avenue. I am very unhappy because of the size and the look of a two story extension and how it would effect my property. Because it would be on my south side it would cast a very large shadow over my conservatory and kitchen blocking out the light . At the moment it is a bright and sunny room. If the development went ahead. My conservatory would become a dark and cold room as it has translucence roof . My second objection is that the two velux windows in the roof that will look right across my patio and garden . I would loose total privacy by being over look by these windows. I have sent a sketch of what it would look like from my property.
