Dear Mr. Porter,

Please find attached photos of parking outside 41 Dominion Road. The photos show at different times of day that the road is not congested with parked cars. It also show cars do park on the northern side of the road. Most of the cars are patrons of the gym on the northern side. So 90% of the day visablility is high and coming out of a driveway would not hinder traffic. Also the traffic lights at the bottom of ham bridge interrupt the flow of traffic allowing plenty of oppurtunity to exit a driveway in a safe manner. One other point is that Lucy from highways says less cars park on the northern side of Dominion Road, this could be due to the fact 98% of houses have driveways. So in fact she is saying that people able to park on their property help the flow of traffic creating less parked cars. So it would be more benifical to encorage off street parking on the southern side of Dominion Road.

Look forward to hearing from you in the near future.

Regards

Chris Simmons
