Dear Mr Hone

RE: EXTERNAL LIFT SHAFT, TOWN QUAY APARTMENTS

I am in receipt of your letter dated the 29-10-2009 in respect of the above.

I am pleased to note that the slate sample is acceptable. Regarding the Kingspan cladding I can confirm that it will not be ribbed and will have a flat finish similar to the sample I left with you. I appreciate that the colours white and cream do not match the existing finish of the building, but of the two I thought that cream might be the better option from the colour chart I left with you on the 16-10-2009. I inquired about having the cladding painted to match the building but was informed that it would be very expensive indeed. If I agreed to paint the rear of the building to match say the cream/white of the colour chart, would that be acceptable to you.

I was not aware that the architect stated that the cladding could be coloured matched.

Yours sincerely
