DESIGN & ACCESS STATEMENT
FOR

Millan Tandoori Restaurant

PLANNING DIVISION
PLAN No. Ar2c008811
DATE RECEIVED 10 MAR 2011

Due to the increase in popularity of this restaurant, it is becoming evident that the kitchen area is inadequate for the cooking and preparation of the required amounts of food.

Therefore the proposed application is for increasing the actual length of the restaurant and kitchen, and at the expense of the dining area, increasing the width of the kitchen, although the restaurant area is increased, it is not proposed to increase the seating capacity.

The external elevations to the rear and sides will be retained in finishes to match the existing and the fire escape doors will remain in the same positions.
