Subject: ref: Planning Application - ADC/0190/10

Mr Peter Barnett.
I am local to this proposed planning at The Women's Institute in Upper West Lane, application no ADC/0190/10, in fact I live opposite. Together with Poppies, Mr and Mrs Sutton who live next door we can all complain that no one in this area have received forms for comments on the above planning applications which were supposed to have been sent out on the 27th of May, 2010.
I for my own part would like to object to the body of the proposals because:-
A. Brown window frames do not match other housing in the area, we all have white to every property in Upper West Lane.
B. Properties in Upper West Lane are generally period and vintage and have no unsightly 21st Centaury additions such as light tunnels and the addition of such tunnels would look out of character and would certainly be detrimental in our Conservation Area that we all share. Plain ugly is what I say. If you disagree with what I say then at least allow for application for diffused glass which is not mentioned anywhere that I can see. The North elevation where these glass monstrosities are proposed to appear overlook three properties to the North and their gardens. They would be seen by all. They would break up the beauty of a plain roof into looking like port holes as seen on shipping in Shoreham Harbor. Not for here.
Please accept these comments as though they were written on your Council headed response forms. Should my letter not be acceptable then please send me the relevant forms. Bearing in mind that I am holiday between the 13th and 18 of this Month and do not to overstep your expiry date for consultations.
Please respond to this letter and advise of its' receipt.
Yours faithfully, James Taylor. 09/06/10
