15th June 2010

Dear Sirs

Re: **Application reference number ADC/0190/10 (Peter Barnett)**

**With reference to the application for sun tubes to be installed on the north roof of the proposed cottages**

There are dormey windows on the south aspect of the roofs. My main concern is the over looking aspect. As I do not know about sun tubes I would like further calcification of said sun tubes regarding over looking.
Regarding the changing of windows to brown U PVC all other windows etc in the lane are in white. The proposed colour change will look completely out of character in this conservation area; I would therefore be against this change.

Please note that I live next door (on the north side) to these proposed developments.

I look forward to hearing from you in due course.
