Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Loss of General Amenity - Other
Comments:	LOSS OF GENERAL AMENITY - The proposed 20m pole with antennas and dishes would have an adverse effect on the visual amenity of the area. It is not sympathetic to the surrounding area being close to the South Downs National Park, various historic buildings in North Lancing Conservation Area and the countryside generally.

HEALTH - 5G exposes people to radio frequency electromagnetic fields (RF-EMFs) at levels that are potentially harmful to health. The ICNIRP standards were based on short term exposure and looked at the thermal effects of the radiation and did not consider the biological effects. There are no studies on cumulative exposure.
https://ehjournal.biomedcentral.com/articles/10.1186/s12940-022-00900-9
Increasing evidence is emerging of the bio effects that 5g exposure is having on health.
https://bioinitiative.org/conclusions/
The proposed site is in a populated area. It is very close to Noah's Ark Nursery School and is close to North Lancing Primary. This would expose young children, that have even greater sensitivity, to RF- EMFS continuously throughout the day. Those living near to the site will be continuously exposed to it and those members of the public using Lancing Manor Park for sports or recreational purposes will also be exposed. Wildlife would also be affected.

LIABILITY - If the damaging effects of 5G masts are not taken into account when considering planning applications and subsequently rejected, the council could face potential health claims. Is this covered by the council's public liability insurance? If not how is it going to be paid?

Kind regards
