29 October 2025

Dear Eve Hearsey

Further to our telephone conversation and your follow-up email of 28 October 2025, please find attached the amended photographs and amended Site/Block plan with the new proposed dropped kerb dimensions.

As you will see, the total area we originally wished to drop the kerb amounted to 7680mm (current dropped kerb of 4580mm plus a further 3100mm for the new dropped kerb).

Following the advice from WSCC Area Engineers informing us that the maximum dropped kerb allowable is 6400mm, we have now amended the proposed dropped kerb to meet their recommendations.

Whereas our original proposal planned for extending the current dropped kerb from the current 4580mm to 7680mm, we have now shifted the new dropped kerb over to the right (when viewing from in front of the house looking out to the road) to a total of 6400mm leaving a length of 1280mm between the end of the new proposed dropped kerb and the lamppost, which will be reinstated as a kerb.

I trust this now meets with the recommendations of WSCC Area Engineers but do please let us know if you require anything further from us.

We look forward to hearing from you in due course.

Yours faithfully

Danny Aslan
