Application for Works to a Tree Subject to TPO (No.6 of 2004)

I am writing to apply for consent to carry out the following works on a Copper Beech tree T1 of schedual one, Tree Preservation Order No.4 of 2004. Tree location, North-western part of the grounds of No; 30 Goodwood Road, adjacent to the boudary of No; 11 Plantation Rise.

Proposed Works:

- Reduce the radial spread by up to 3 metres, with the longest cuts being made on the most extended branches, in order to maintain the tree at a desired size and shape.

- Crown raise to approximately 4 metres.

- Remove all deadwood and badly crossing branches.

- Remove back to the main stem an old limb (previously cut) approximately 1 metre up from the base of the tree, facing north-east (as shown in photograph 3).

These works are proposed to preserve the long-term health and structure of the tree, while also allowing more light into the property and garden.

Please find attached supporting photographs (including reference to pic 3 as noted above).
