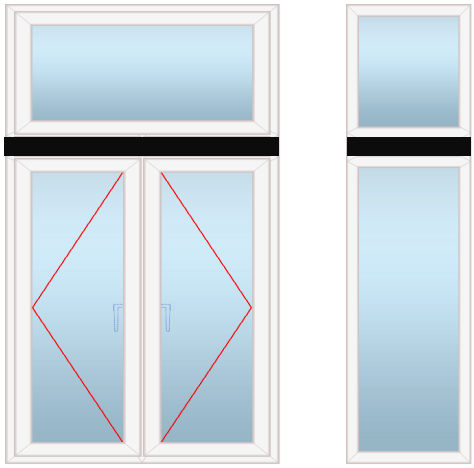
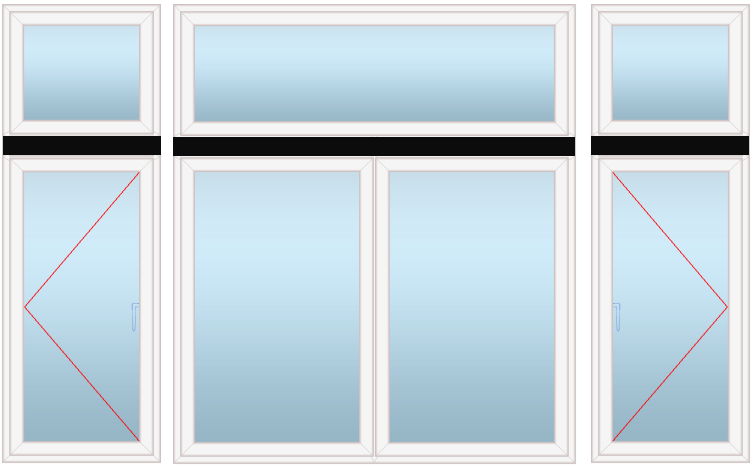
Tina Ball Pier Lettings 2 Warwick Mansions

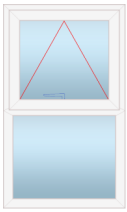
FRONT BED AND RETURN



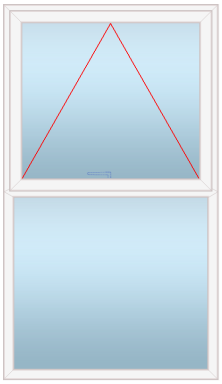
LARGE BED BAY



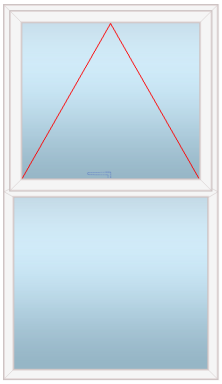
BATHROOM



KITCHEN



REAR BEDROOM



This Property is in conservation area and I think this was Warwick House opposite The Steyne, in the day and before conversion to flats and shops. Particular attention to the front façade windows of designs and detail must be produced as close as possible to the existing windows. Worthing Borough Council may not Favor PVC even though many have been change to PVC over the years but with careful attention to detail this can be over come with their permission. So the top line on this page is the front façade, firstly these five windows will need to be equal glass site line like this and made into ten frames to create a thicker transom line and reproduce the black horizontal line in, also by doing it this way we will be able to produce the exact dimension form glass to glass here which is the kind of eye line detail that the council will be looking for in this building of interest

Please note; Trickle Vents to the windows are Law, since May last year, these can disturb a building like this and often they are exempt from the ruling in listed buildings, it would be worth running this question by the council when you make an application.

Supply and fit prices come with full certification and a 10 year guarantee. Our windows are fitted by fully trained MTC fitters and each product is measured and fitted to a regulation set out by FENSA.
