Attention Mr Gary Peck
Planning Services Manager

Dear Mr Peck, I am in receipt of your letter dated October 30th regarding the above property
Applying for retrospective planning permission for solar panels to garage "with screening".

When I first got In Touch with you when these were originally erected 5/6 months ago, I
Stated that they were, and still are, extremely intrusive to our property.
We use our garden most of the year, and the last thing we want to be looking at is this very
Amateur and ugly contraption that has been put up to the bottom of our garden right hand side.

In the summer when the trees and bushes were covered in flowers and leaves it still stands
Some 8/10 feet above our fence line. Now that the winter is here it is even more prevalent.
We sleep in the back of our bungalow facing our garden, and it rattles with the extrely high winds we have been having lately, and being on the sea side, will continue to have, this constantly keeps us awake ar night. I am quite convinced it will at some stage be blown down and cause incredible damage to whose ever garden it lands in.
Also a lot of the seagulls are making nests in it and the noise is
Very apparent.
Although you say he has asked for screening, there is no mention of the height this would be,
or materials used.
NO MATTER WHAT IS DISCUSSED OR APPLIED FOR, THIS IS THIS STILL AN EYESORE to not only ourselves but our immediate neighbours, who we know are just as distressed as we are.
He has shown absolutely no regard for anyone but himself, and once you agree to this, there is absolutely no way of knowing what will follow.

Yours Margaret Wesley

On behalf of Mrs Margaret and Mr Alan Wesley
