Privacy Light and Noise

The occupants have decided to surround the front of the property with a very unattractive fence and gate, this now seems to serve the purpose of providing a home for a dog and small children to regularly play, with a rumor that they are considering putting a large trampoline in the front garden.

This has had a significant detrimental effect to our privacy, as we are now continually overlooked when people are congragated in the front garden. The dog continues to growl when we walk past, in addition when they are entertaining the noise from gathering adults as they party in both the front and back gardens now offers no releaf.

This is a narrow close at the best of times and to approve this application will only set a precedence to allow other home owners to surround their front gardens with unecessary fencing, closing in what small open space there is into what will only look like a row of back gardens.

Having an open front garden makes the houses and community a much more attractive place to live and for potential home buyers.

I urge you to seriously consider these detrimental effects when reviewing this application.
