Dear Gary Peck, I write in response to correspondence of 08/01/2021. I opposed the original planning application for 60,Brighton road on valid grounds ie. loss of light and invasion of privacy. The application was nevertheless validated. The extension and elevations which have since taken place have exacerbated the situation and this serious invasion of my personal privacy is unacceptable. The construction differs from the approved plans in the following ways:
1) The approved plans showed an incorrect height above ground level for the decking. The final height above ground level is @ three times higher than shown in the plans, this brings the surface of the decking to almost the same height as the top of my fence. People sitting or standing on the decking can now see straight into all my windows and look down into all of my garden. There is nowhere to hide in my garden nor my home. 2) The decking is much nearer to my boundary than shown in the approved plans. Mrs.McDonald, 5, Pebbleview,62, Brighton road, BN158ET
