Dear Sir,

Re: The Longshore, Brighton Road, Shoreham by Sea

Further to your letter dated 6th June I would like to respond as follows

Having viewed the amended application, our objection to the scheme remains. They have clearly noted the objections on the grounds of potential odour and fumes from the projected cooking area, and have responded by putting a fan-type 'odour remover' on top of it. Firstly I have very little faith in this, judging by the complete failure of their fans on the back of the building, which emit both smells and visible emissions when they are using the kitchens.

The other objection which was made in our last letter to you also remains. This plan to cook in the garden can only contribute to the noise (already very considerable) from this area on every pleasant day of the Summer. However hot it is, we are frequently forced to close the windows to our flat to try and shut out the constant noise of shouting, and children being allowed to scream and run riot.

I trust the above will be given serious consideration.

Yours sincerely,

[redacted]

Mrs A R Limbert
