[redacted]

Morning Mr Peck
I presume that your department hand delivered a set of plans for the above , all to which I have no comment, other than the gas main shown on a separate drawing and not issued passes over an enclosed light well directly below our guest bedroom, as you are aware Beach House has a non compliant Fire Alarm Installation, with a forged commissioning completion certificate!!!
As a retired engineer would as you to cont an additional gas drop valve linked to the above to provide additional protection .
As long as Worthing and Adur Council take full responsibility should a explosion or fire occur then I have no further comment.
Yours Sincerely
Robin Biggs
Owner Flat 6

Robin
