Dear Sir / Madam

Re: Ref. AN7M/0988/26

I am writing with reference to the proposed loft conversion rear gable extension.

I have concerns the proposed gable extension will drastically effect the daylight in my lounge/dining room obtained via my south facing windows.

Please see attached photographs for reference and understanding of my concern, which I trust will be taken into consideration prior to any planning approval.

Further more I appreciate the east windows in the proposed roof extension relate to a bathroom and as such should be obscure glass however this will overlook my garden which currently has no overlooking issues.

On a personal note I purchased my property nearly 30 years ago

because of its bright light
rooms within an area of what
was traditional bungalows.

However once again we have the
proposal for a bungalow to be
turned into a two storey dwelling,
to the detriment of its neighbour.

Yours Faithfully
