Our comments to the above are as follows:

We have viewed the above plans and although have no objection to the house extension note on the application form questions 5, 7 and 8 are all ticked "No". We ask is this an oversight or due to the fact the entire frontage "had already" been excavated and all trees and shrubs removed (front and back) prior to the refused original plans submitted last year (AWDM/0635/15). Our main concern is the frontage and current parking of the households many vehicles as shown as remain unscreened. We ask will we be given the opportunity to view and comment when the frontage plans are submitted as concerned the current amount of household parking detrimental to the green area of Mill Hill.

I submit photographic evidence as follows

Spring 2015 prior to refused plans AWDM/ 0635/15

2015 after excavation but prior to planning (note - removal of all trees / shrubs)

Current - unsightly appearance of a car park - all household vehicles
