PLANNING SERVICES

Dear Gary Peck,

With reference to Ingleside Garage AWDM/0271/19

We are very concerned about the application that the garage will be operating body work repairs and paint spraying, tyre and exhaust fitting.

This will create more noise and disturbance from the garage, with a compressor and other various machines operating. A compressor has on occasions has been left on overnight, switching on and off.

Our bedroom and lounge backs onto the garage, which we experience noise for the garage all day.

We both work shifts and have concerns about the increase of noise this will generate.

We have also noticed since the garage has changed hands is being used outside permitted working hours.

Yours Sincerely
