Dear Sir

Re the development of Kingdom Hall, there are a few things to point out.

You are allowing for 5 spaces for parking which is not alot these days as most people have two cars, then they will do as they have already done, park out in the road, which is not good because there could well be emergency services trying to get through with more ~~cars~~ lorries, this is

2

more likely.

No for the road you should be looking to do it up right through with all extra use, I for one would chip in, if every body did, it would not be too hard.

Yours faithfully
