Dear Sir,

Please accept my sincere apologies for not replying earlier but I have been very ill and I have only just felt well enough to respond to your letter dated the 18th of January.

I also apologize for email and not a hard copy but I thought time was of the essence and I thank you for giving me the opportunity to raise a few matters which you might consider in the above application.

1. When the original planning application was submitted there was no mention of railings and glass around the top of the extension if it had I would of objected at the time as this suggests to me that living use is intended or access or usable area.

2. This is not a small extension its approx 18 x 5 metres accessing my side and goes across the back of the building and quite frankly dominates the outside garden area and looks down directly into my garden and Four others taking away our privacy and also light in the afternoons to my garden.

3. Its a huge structure and with the railings and future glass its full on for want of better words and as there are no others in the area it is out of keeping with all the other houses.

4. If planning is granted I can see this as the opening for others to follow suit.

5. I see no reason for granting permission and I am strongly against for a wooden trellis as I can picture this to be of huge proportions plants all over it to further take my afternoon light and be even more hideous than the railings that are there at present.

Yours sincerely,

Eric Brown, 73 Southwick Street, Southwick, Sussex.
