With regards to the application to fell and replace one plum and one laburnum I have the following comments:

I am neutral to the felling of the plum tree although I would not want to see any damage caused to the existing hedgeline by its removal.

The laburnum, however, straddles the boundary between 8 and 10 Fairview Road and while it would benefit from some sensitive pruning I would not like to see its complete removal as it would disturb the surrounding hedgerow and sycamore 2m to the north.

Both of these trees and hedgerow have in the past provided good screening between no.8 and 10. However, in light of the new landscaping and planned development of no.8 in the near future, I do have concerns about the loss of privacy already incurred and potentially to occur.

Yours sincerely

Mr R. Godman
