

Dear Sir / Madam,

I am writing with regards to the above reference and the proposed development to a property directly at the back of our property resulting in some concerns we have with this proposed development.

The plans are showing dormers to side roof-slopes, one of which looks directly over our back garden.

It is this dormer that is of some concern. The plans show two windows but do not state whether these windows have clear glass or obscure glass. It also does not state if these windows are of a fixed state or have openings?

Moreover this dormer will be in direct line with our back bedroom window which would allow viewing access into this particular bedroom of our property. This would be too invasive we feel.

I also understand that there is a required distance of 22 metre's between the windows of the proposed dormer and our bedroom window, which apparently after speaking to Peter Barnett is under this required distance.

So at this moment in time please take this email as a 'note of concern' and we would appreciate some answer's to our questions and concerns.

Kind regards

Linda Bell @ Malcolm Brown

(36 Mile Oak Road, Southwick).
