Dear Jo,

I received a letter from yourselves on 12/13 September regarding the **demolition of an existing garage and construction of a new pitched roof garage** which is being modelled on mine as I am the adjacent neighbour at no. 16. I called and left you a voice message on the day I received this letter but have had no response, hence my email to yourself.

I want to raise the concern I have with regards to this work as the current garage contains asbestos and the current building is highly unstable and falling apart. I urge an inspection to assure me that it is safe and that no particles are being dispersed into the air.

[redacted]

Best
Pamela
