re: 5 East St Shoreham-by-Sea - 2nd floor development and roof extension.

attn. Mr P. Barnet,

Opening up and extending this rear 2nd floor roof area appears to be excessive for this town centre site and situation, and will seriously encroach on the privacy previously enjoyed by nearby properties. It could also set a precedent for further intrusive developments.

In the past the council has been very careful to preserve the character and environment of these long established buildings in this conservation area and we trust this will continue.

A. Humphreys
