Subject: Mast Objection (AWDM/1596/25 BN13 3FJ)

To: <planning@adur-worthing.gov.uk>

Cc:

Dear Planning dept and Worthing Councillors,

I am writing to object to the mast planning application detailed in the subject line.

I can't believe the height of it and the number of antennae. It'll be a huge eyesore and make the place look like something out of a sci fi movie. We should not be allowing these things in the heart of our communities. The aesthetic impact will be enormous.

Should we be encouraging even more smart device addiction in adults and children? This is reckless and is not conducive to good community relations. I work with children and I see the negative impact of these technologies daily, and it's getting worse.

The impact on the environment will be awful too, why are we not thinking about the wildlife and aesthetics of the area, in these times when we need to think more about the environment, not less. It will most definitely not enhance the character of the area. The height is crazy! This will absolutely not add to the character of the site in any positive way.

Aside from the horrendous impact of this monstrous device on the area, why are we not taking health issues into account? I have done significant research into the health risks etc. I'm just appalled that these masts are being allowed into the heart of our communities. This site is itself right by the community centre! The health risks are huge. Imagine a child attending a school all day near one of these things, using iPads at school and then coming home to sleep near a mast like this, too. It's pollution with radiation that people just can't get away from. They have no choice. I do understand that the government doesn't want us to mention health concerns, but it should be top of the list of concerns, not disregarded.

I visit this area regularly and will be watching developments with interest.

Kind regards,

Camilla Berry
