Dear Sir,
I object to the development of the Northbrook college Broadwater site being developed into anything other than an educational facility as this is the wish of the original owner. As per the restrictive covenant registered with the land registry.

There is also insufficient parking at the site for so many staff which will lead to parking on surrounding streets which already have insufficient parking. There will also no doubt be additional noise from traffic to and from the site, that will be at all hours if nighttime shift work is undertaken. Additional air pollution from more traffic is likely, particularly if police cars etc are expected to come go throughout the day and possibly night.

There will also be more light pollution with late and/or overnight working and probably additional illumination added for security purposes.

The surrounding residential roads are already dangerous with school parents parking in the streets including illegally and on pavements. The addition of move cars including police cars will only make this more dangerous on our narrow streets.

Regards
David Upfield
