**PROPOSED EXTENSION AT 97 OFFINGTON DRIVE, WORTHING, BIODIVERSITY STATEMENT.**

The planning application relates to a 1930s semi detached house in Worthing.

The proposal is to replace an existing sub standard rear extension with an extension built to current standards on the same footprint.

As there is no loss of potential habitats for birds, insects or small mammals, it is felt that a reasonable enhancement would be the addition of two nesting boxes in locations chosen by the client.
