1. INTRODUCTION

- 1.1 Reeves Transport Planning is appointed to provide a Transport Report in support of a planning application on land at 37 Albion Streets (A259) Southwick. The proposal seeks to demolish the existing car sales and repair business and erect a new residential development. A site location plan is attached as Appendix 1.
- 1.2 This Transport Report is drafted with reference to West Sussex County Council's guidance on the content of Transport Assessments and the Ministry of Housing, Communities & Local Government Guidance on Travel Plans, Transport Assessments and Statements, published March 2014.
- 1.3 This Transport Report will present evidence that confirms this new proposal will not create a detrimental impact in terms of highway safety or the free flow of traffic to a degree that could be considered as failing the tests of the planning process.

2. POLICY CONTEXT

- 2.1 This section of the Transport Report sets out the relevant policies, at a national and local level, that this proposal will be judged against.
- 2.2 The *National Planning Policy Framework* (NPPF), adopted in March 2012 and updated December 2024, details the Government's planning policy and is a material consideration in planning decisions. Its emphasis is on minimising the need to travel, reducing car use and encouraging the use of sustainable transport. Paragraph 115 states that in assessing development sites it should be 'ensured that:

- *sustainable transport modes are prioritised taking account of the vision for the site, the type of development and its location;*
- *safe and suitable access to the site can be achieved for all users;*
- *the design of streets, parking areas, other transport elements and the content of associated standards reflects current national guidance, including the National Design Guide and the National Model Design Code⁴⁸; and*

- *any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree through a vision-led approach.*
- 2.3 At the heart of the NPPF is a presumption in favour of sustainable development, and decision makers, at all levels, are encouraged to seek approval where possible. Paragraph 116 emphasises this and states that *‘Development should only be prevented or refused on highways grounds if there would be an **unacceptable** impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be **severe**, taking into account all reasonable future scenarios.*
- The *Adur Local Plan* was adopted December 2017, and it outlines a comprehensive vision and strategy for the future of Adur until 2032. It seeks to achieve a balance in meeting the needs for development – such as housing, employment, retail, and community facilities, while striving to protect and enhance the character and features of Adur. It states that *‘Shoreham Harbour will be the focus of a significant level of development to facilitate regeneration of the Harbour and neighbouring communities, which will be delivered through an Area Action Plan to be prepared jointly between Adur District Council, Brighton & Hove City Council and West Sussex County Council’.*
 - *Policy 28: Transport and Connectivity* explains that *‘in order to secure significant improvements to transport and mobility in Adur, new development should:*
 - *Promote a sustainable transport system along the coast to help in the regeneration of the area including Shoreham Harbour, ensuring that the A259 is improved;*
 - *Provide for improvements to the road network, including the A259 and A27. Measures include junction improvements, traffic calming, and where necessary new roads. Appropriate mitigation measures to address capacity issues at a number of key junctions on the A259 and A27 will be sought.’*

- 2.4 This site is contained within the Harbour Mouth development area, which is included in the *Shoreham Harbour Joint Area Action Plan* (JAAP – adopted October 2019) as Policy CA6. An extract of JAAP Map 11 shown below highlighting the application site.

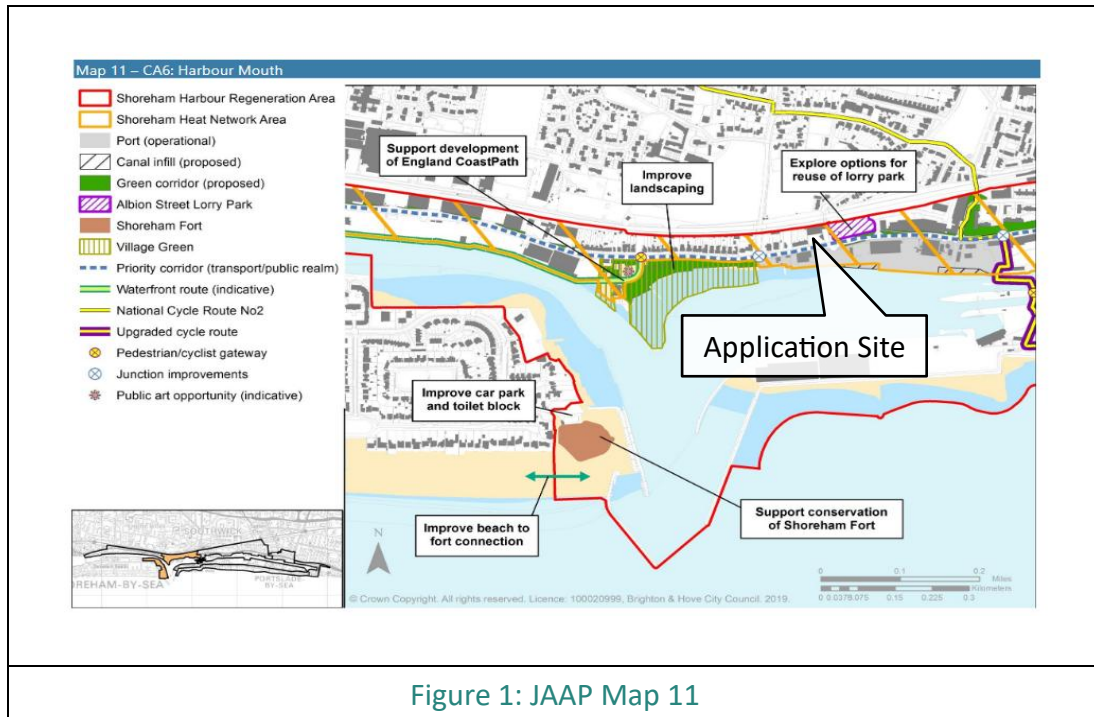

Figure 1: JAAP Map 11

- 2.5 2.11 The *JAAP* is a strategy for the regeneration of Shoreham Harbour and surrounding areas. It includes proposals and policies for new housing and employment generating floorspace; and for upgraded flood defences, recreational and community facilities, sustainable travel, environment, and green infrastructure improvements. The vision for Shoreham Harbour is that *‘by 2032, Shoreham Harbour Regeneration Area will be transformed into a vibrant, thriving, waterfront destination comprising a series of sustainable, mixed-use developments alongside a consolidated and enhance Shoreham Port which will continue to play a vital role in the local economy.’*
- 2.6 *Objective 5: ‘Sustainable Travel’* states that *‘to improve connections and promote sustainable transport choices through ensuring that new developments are well served by high quality, integrated and interconnected networks, improved pedestrian,*

cycling and public transport routes and seeking to reduce demand for travel by private car in innovative ways’.

- 2.7 *Policy SH5: ‘Sustainable Travel’ – Parking* explains that ‘car parking provision will be considered as part of the overall package of measures that impact on the need to travel resulting from the development. Proposals should include adequate levels of car parking for residential development or measures to promote lower levels of car ownership’. The level of car parking proposed will meet WSCC’s parking standards.
- 2.8 *JAAP* also considers the future provision of a cycle route along the A259 and informs that ‘developments should be set back sufficiently from the A259 corridor in agreement with the highways and planning authorities, to provide space for a high-quality segregated cycle route which provides stepped separation from road vehicles and pedestrian facilities, to deliver green infrastructure improvements, and to prevent a canyoning effect to ensure that residents are protected from noise and air quality impacts’.
- 2.9 The *Adur Local Plan & Shoreham Harbour Transport Study*, 2013, and addendums assessed the impact of proposed housing and employment development at Shoreham Harbour on the highway network. It proposes a package of mitigation measures, which will reduce the impact of development and encourage a shift in travel patterns to sustainable modes of transport. The package consists of sustainable transport measures; behaviour change initiatives and junction capacity improvements. Examples of behaviour change initiatives include travel plans, car sharing schemes, encouraging shared car ownership, and cycle training.
- 2.10 This Transport Report will demonstrate that the transport implications of the proposal meet the requirements of both local and national policies, and that it does not have any adverse impact on highway safety or capacity.

3. EXISTING CONDITIONS

- 3.1 The existing site is a brownfield site located on the north side of Albion Street (A259), Southwick. The site is occupied by a car sales and repair business with an

internal floor area of 657sqm and total area of circa 1300sqm. The development of the site to the west was approved under reference AWDM/1999/21 for the erection of 55 affordable flats within two blocks of 4-6 storeys. This site is nearing completion. The site to the east of Victoria Road, formerly a coach and lorry park, has secured planning permission for circa 1980sqm of B8 self-storage use, which appears to have commenced construction.

3.2 Albion Street (A259) Road is urban in nature and provides both local and strategic access between Brighton & Hove to the east and Worthing to the west. This section of Albion Street provides direct access for a small number of residential properties and commercial building.

3.3 The site has two existing vehicular access points directly from Albion Street. The footway along the frontage is in a poor state of repair, which is evident in the photograph opposite. There are continuous double yellow lines along both sides of Albion Street.

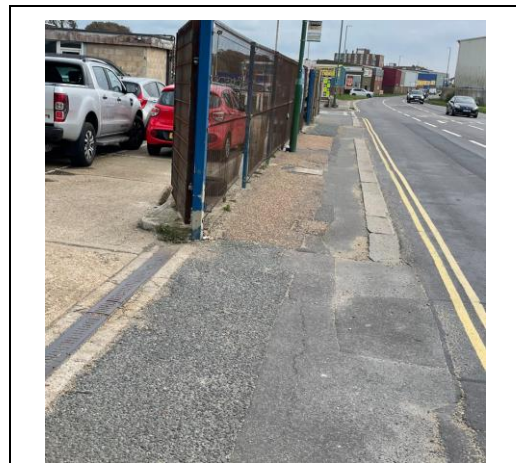

Figure 2. Footway detail looking east

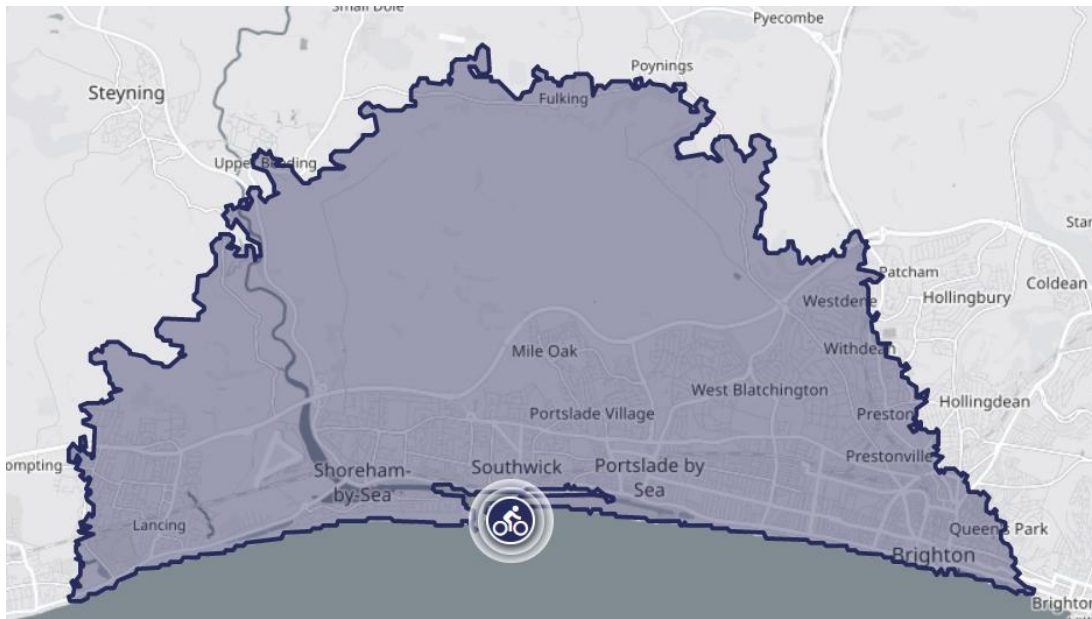

3.4 This section of Albion Street is subject to a 30mph speed limit.

Accessibility by Foot and Cycle

3.5 It is generally accepted that walking and cycling provide realistic and important alternatives to the private car. Both are also actively encouraged to form part of longer journeys that involve public transport. The distances that people are prepared to walk, or cycle, depend on their fitness and physical ability, journey purpose, settlement size, and walking/cycling conditions. Department for Transport technical guidance for Local Authorities - Local Cycling and Walking Infrastructure Plans notes that *'cycling has the potential to replace trips made by other modes, typically up to 10km, although some people will cycle greater distances. For walking, the distances travelled are generally shorter, typically up to 2km'*.

- 3.6 There are a wide range of amenities circa 900 metres from the application site at Southwick Square. Educational facilities at Glebe Primary School and Shoreham Academy are also just over 900metres from the application site.
- 3.7 The proposed development is within a short cycle of National Cycle Route 2, which links the site east to Brighton & Hove and west to Lancing and Worthing. Figure 1 illustrates the areas within a reasonable 30minute cycle, which includes all of Shoreham by Sea, Lancing and Brighton & Hove.

Figure 3

Accessibility by Bus

- 3.8 There are bus stops immediately adjacent to the site, visible in figure 2.
- 3.9 The stops are served by the 700 route operated by Stagecoach, which provides a regular connection westbound with Durrington and eastbound with Brighton & Hove. There is an additional bus service (46) that uses stops on Park Lane, which are 400metres from the application site.
- 3.10 A summary of these services and frequencies are presented in Table 3.1. The relevant timetables are attached at Appendix 2.

Table 3.1: Local Bus Services

		Mon to Fri	Saturday
700	Brighton - Hove - Fishergate - Shoreham by Sea - East Worthing - Worthing – Durrington	Every 10mins	Every 15mins
46	Southwick - Portslade - Hove - Churchill Square – Old Steine – London Road - Hollingbury - Coldean	Every 10mins	Hourly

Accessibility by Train

- 3.11 Southwick Rail Station is circa 600 metres east of the site. The station is served by Southern services that provide frequent journeys to London Victoria, Gatwick, Brighton, and Southampton. The Southern route map demonstrating routes to and from Southwick Rail Station is included at Appendix 3.
- 3.12 In summary, it is considered that the proposal site is in a sustainable location with a very good level of accessibility to public transport modes, as bus stops, and rail station are within a short walking distance.

4. PROPOSED DEVELOPMENT

- 4.1 The proposal seeks planning permission to demolish the existing garage and construct a new block of residential flats, consisting of five one-bedroom, 23 two-bedroom and four three-bedroom units.
- 4.2 The proposal includes 22 car parking spaces, which are accessed via a new two-way access that is in the same location as the easternmost access currently serving the garage. This route also provides access to the refuse bins. Cycle parking for 38 bicycles is incorporated in a dedicated facility and accessed via the main entrance. The provision of parking and its implications are discussed in Section 6.
- 4.3 Site layout and ground floor layout drawings showing the parking provision and access arrangement of the site is attached at Appendix 4 and 5, respectively.
- 4.4 The proposal will remove the westernmost crossover and reinstate that as footway. The section of footway along the site's frontage will be resurfaced to bring it up to an

appropriate standard. Tactile paving over the retained crossover will be incorporated with these works.

5. TRANSPORT AND TRAFFIC IMPACT

5.1 The TRICS database version 8.25.6 has been interrogated to understand the traffic impact of this proposal when compared with the extant use. Only sites in England and Wales, outside Greater London have been selected

5.2 The tables below present a summary of the data from this analysis. The full data sheets are attached at Appendix 6.

Table 5.1: 15 Vehicle Services – A Vehicle Repair Garages Slow Fit

Period	Trip Rates (per dwelling)			Predicted Trips (657sqm)		
	Arrivals	Departures	Total	Arrivals	Departures	Total
AM Peak (08:00–09:00)	1.350	0.608	1.958	8.872	1.958	12.865
PM Peak (17:00–18:00)	0.126	0.629	0.755	0.827	4.134	4.961
Daily Total	10.282	10.599	20.881	67.557	69.643	137.2

Table 5.2: 03 Residential – C Flats Privately Owned

Period	Trip Rates (per dwelling)			Predicted Trips (32 Flats)		
	Arrivals	Departures	Total	Arrivals	Departures	Total
AM Peak (08:00–09:00)	0.082	0.198	0.280	2.616	6.340	8.956
PM Peak (17:00–18:00)	0.173	0.116	0.289	5.535	3.723	9.258
Daily Total	1.464	1.580	3.044	46.893	50.516	97.409

5.3 The data suggests that the proposal will create a material reduction in the traffic impact of the site. The analysis for the extant use only considers the impact of a ‘slow fit’ garage, this does not factor into the analysis the impact of the MOT ‘fast fit’ service or the car sales business. Both of which would add a significant volume of traffic.

- 5.4 It would be reasonable to suggest that the proposal for 32 flats will represent a material reduction in traffic impact when compared to the extant use.

6. PARKING DEMAND AND PROVISION

Parking Demand

- 6.1 West Sussex County Council's 2020 Guidance on Parking at New Developments has been used to understand the likely car parking implications of the proposal. It sets out indicative levels of on-site car parking and considers key characteristics such as car ownership and accessibility to sustainable modes of transport. It is used as an initial guide for developers who should also undertake a site-specific assessment and seek to balance operational needs, space requirements, efficient use of land and cost attributed to providing parking and, where relevant, attracting and retaining staff.
- 6.2 Section 4 of the guidance sets out the key design principles. Principle E notes that *'good parking design is as important as providing the appropriate number of spaces. Therefore, developers will be expected to provide balanced, mixed, and flexible parking provision and ensure that all spaces are useable without creating highway safety issues such as vehicles overhanging footways'*.
- 6.3 Table 1 of the Guidance sets out the cycle parking requirements. It notes that cycle parking is required on the basis of 0.5 space per flat, if in a communal storage area, up to two-bedrooms. This suggests a provision for the development proposal of 14 spaces within a communal area.
- 6.4 The site is in Parking Behaviour Zone (PBZ) 4, which suggests a parking demand of 0.9 spaces (one-bedroom) 1.1 spaces (two-bedroom) 1.7 space (three-bedroom). This suggests a maximum provision of 37 spaces.
- 6.5 The sustainable and accessible location of the proposal site means that car ownership levels could be lower than the average across the whole ward. Therefore, Nomis data has been interrogated to understand local car ownership patterns, as it is a database of statistics derived from UK Census data.

- 6.6 The Nomis data is attached, as Appendix 7. It informs that residents of 32 flats in the vicinity of the application site are likely to own a maximum of 23 vehicles. The data suggests that just under 50% of the occupants are likely to have access to no cars or vans in the household.

Parking Provision

- 6.7 As described above the proposal includes a car parking provision for 22 spaces, or a ratio of 0.69 spaces per flat. This principle of a shortfall in parking provision has been supported by other approved planning applications. The adjacent development AWDM/1999/21 has a ratio of 0.56 and AWDM/1450/21 has a ratio of 0.36. The proposals parking ratio exceeds these two examples as such the allocation of parking should be acceptable in principle. The provision of cycle parking exceeds that of the design guidance and would therefore actively encourage this mode as a realistic choice.
- 6.8 Visitor parking has been omitted, supporting a more sustainable, low-car lifestyle for future residents.

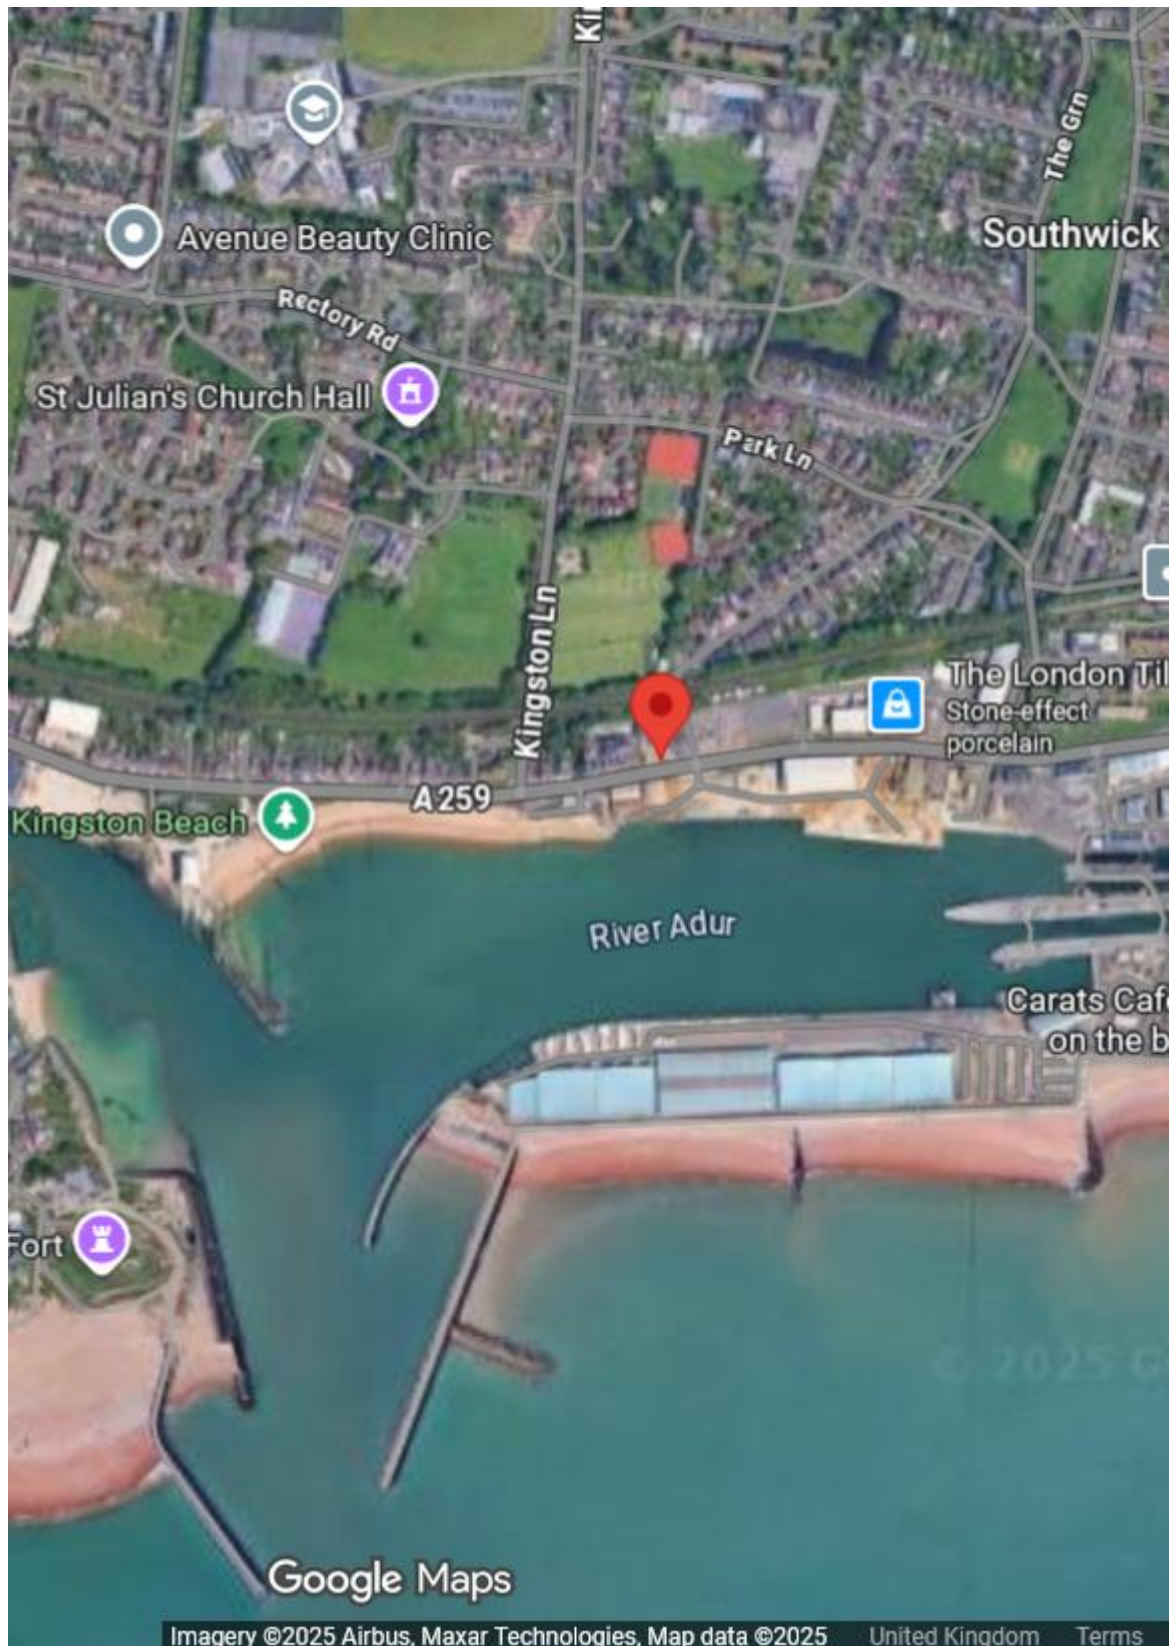

7. SUMMARY AND CONCLUSIONS

- 7.1 Reeves Transport Planning has been appointed to provide a Transport Report in support of a proposal to demolish an existing car sales and repair business and erection of development consisting of 32 flats. The proposal incorporates 22 car parking spaces, and 38 cycle parking spaces. The westernmost crossover serving the site will be stopped up and reverted to footway. The easternmost, which is retained for the site's access will be upgraded and the footway adjacent to the site resurfaced.
- 7.2 The application site is located in the Harbour Mouth area of the regeneration strategy of Shoreham Harbour. This is an area that is subject to major commercial and residential redevelopment. Sites near the application site have recently been developed as residential use, or are currently under construction, or have secured change of use planning permissions.

- 7.3 The application site has excellent accessibility to public transport services, with a bus stop adjacent to the site, and a full range of amenities are within a short walk.
- 7.4 The analysis of the respective traffic impacts confirms that the proposal will represent a material reduction when compared with the extant use of the site.
- 7.5 The site provides a level of car parking provision that will meet the principles established by other nearby approved developments. The shortfall of one car parking spaces is not considered to represent a material safety concern that would adversely affect current highway conditions. Cycle parkin provision exceeds that of the design guidance, which will encourage the use of this mode.
- 7.6 Therefore, taking all the relevant information into consideration including the likely significant reduction in daily traffic movements, the accessibility of the site and strong links to all modes of travel as well as the space to accommodate likely residents parking demand, it is considered that the proposed development will not have a **severe** impact on highway capacity or an **unacceptable** impact on highway safety.

N700 runs hourly during the night, 7-days a week.
Single fares are £5 for all journeys on the N700, or £2 for existing holders of DayRider, MegaRider or NightRider tickets.

Through tickets are available across our Coastliner routes 700/701 between Portsmouth, Chichester, Littlehampton, Worthing and Brighton and are only valid on these routes.

valid from 31st August 2025

APPENDIX 3.

SOUTHERN RAIL ROUTE MAP

ACCESSIBILITY

✓ Step-free access between the street and all platforms
⚡ Some step-free access between the street and platforms
➡ Step-free access is available in the direction of the arrow
✗ No step-free access between the street and platforms

Notes:
Platform access points may vary and there may not be step-free access to or between all station areas or facilities. Access routes may be unsuitable for unassisted wheelchair users owing to the gradient of ramps or other reasons.

Step-free access between train and platform requires a staff-operated ramp. If you require a ramp or need help getting on or off trains, please book this in advance and we will make sure staff are available to help, otherwise there might be a significant delay to your journey.

Gatwick Express and Southern Assisted Travel: 0800 138 1016

STAFF AVAILABILITY

✓ On-train or station staff available at all times
⚡ On-train or station staff available at certain times only
✗ No on-train or station staff available

SERVICES AND FACILITIES

This is a general guide to the basic daily services. Not all trains stop at all stations on each coloured line, so please check the timetable. Routes are shown in different colours to help identify the general pattern.

TRICS DATA SHEETS

Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use: 03 - RESIDENTIAL

Category: C - FLATS PRIVATELY OWNED

Selected Vehicle Type: Total Vehicles

Selected regions and areas:

02	SOUTH EAST		
	WS	WEST SUSSEX	1 day
03	SOUTH WEST		
	DV	DEVON	1 day
06	WEST MIDLANDS		
	SH	SHROPSHIRE	2 days
08	NORTH WEST		
	MS	MERSEYSIDE	1 day
09	NORTH		
	TW	TYNE & WEAR	1 day
10	WALES		
	CO	CONWY	1 day
11	SCOTLAND		
	HI	HIGHLAND	1 day
12	CONNAUGHT		
	MA	MAYO	1 day
14	LEINSTER		
	LU	LOUTH	1 day
	WX	WEXFORD	1 day

This section displays the number of survey days per TRICS® sub-region in the selected set.

Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

Primary Filtering Selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter:	DWELLS
Actual Range:	6 to 47 (units:DWELLS)
Range Selected by User:	6 to 50 (units:DWELLS)
Parking Spaces Range:	4 - 550

Public Transport Provision:	
Selection by:	All Surveys Included
Date Range:	01/01/16 to 26/11/25

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:	
Friday	2 days
Monday	4 days
Thursday	1 days
Tuesday	1 days
Wednesday	3 days

This data displays the number of selected surveys by day of the week.

Selected survey types:	
Manual count	11
Direction ATC Count	0

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines

Selected Locations:	
Edge of Town	1 days
Edge of Town Centre	6 days
Neighbourhood Centre	2 days
Suburban Area	2 days

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:	
Built-Up Zone	1 days
No Sub Category	1 days
Residential Zone	9 days

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicle Counts:	
Servicing vehicles Included	8 days
Servicing vehicles Unknown	3 days

Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

Secondary Filtering Selection:

Use Class:

C3	11 surveys
----	------------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

750 - 9872

Population within 1 mile:

1,001 to 5,000	1 surveys
10,001 to 15,000	1 surveys
20,001 to 25,000	4 surveys
25,001 to 50,000	2 surveys
5,001 to 10,000	3 surveys

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

125,001 to 250,000	4 surveys
25,001 to 50,000	2 surveys
5,001 to 25,000	1 surveys
50,001 to 75,000	2 surveys
75,001 to 100,000	2 surveys

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	4 surveys
1.1 to 1.5	7 surveys

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

Petrol filling station:

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

Travel Plan:

No 11 surveys

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present 11 surveys

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

COVID-19 Restrictions:

Yes - At least one survey within the selected data set was undertaken at a time of Covid-19 restrictions

Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

20:00-21:00								
21:00-22:00								
22:00-23:00								
23:00-00:00								
Total Rates:			1.464	46.893	1.580	50.516	3.044	97.409

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Audit Code: d351247f-7e5e-4beb-86f9-f876c33d3822

Parameter Summary:

Trip rate parameter range selected:	6 - 50 (units: DWELLS)
Survey date date range:	10/07/2017 - 19/06/2023
Number of weekdays (Monday-Friday):	11
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

Total Rates:			1.222	39.044	1.314	42.063	2.536	81.107

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

Parameter Summary:

Trip rate parameter range selected:	6 - 50 (units: DWELLS)
Survey date range:	10/07/2017 - 19/06/2023
Number of weekdays (Monday-Friday):	11
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
